

the Smart
Alternative
to WINDOW
REPLACEMENT

Quick and easy installation

Vista™ Window Film is professionally installed with no mess, no hassle – and minimal or no disruption to activities at your home or business. With Vista, you can be assured of a comfortable, beautiful, and more secure environment in which to live or work. Vista Window Film comes with a lifetime manufacturer's warranty.

Most homeowners fail to realize:

- Windows play a vital role in the home's energy efficiency allowing solar heat to enter in the summer months and home heat to escape in the cold months.
- Windows typically account for 15 to 30% of the total heating load and may account for more than 50% during the summertime cooling load.
- The most cost-effective way to cut home energy loss is to upgrade existing windows with the installation of Vista™ Window Film.

ENERGY SAVING FILM

Improve energy efficiency

While damaged or deteriorating windows simply have to be replaced, Vista™ Window Film provides an affordable alternative to replacement when your goal is to improve energy efficiency. In fact, the cost for quick, professional installation is about one-tenth the cost of replacement windows!

More importantly, Vista energy-saving film can also lower your home's cooling costs by up to 50% by blocking solar heat gain.

See how much you can save at www.vista-films.com/challenge.

Help the environment

The challenge of reducing energy consumption is on every homeowner's mind as rising energy costs and power shortages make news every day. Reducing your home's energy consumption not only saves you money, it also helps the environment.

Some films even qualify for a tax credit or an energy cost rebate. Check with your local officials or a professional Vista Window Film dealer for more information.

Preserve and protect

If you've remodeled, redecorated, or otherwise updated your home, you've taken great care in selecting the colors—but UV rays passing through windows can cause colors of nearby surfaces to fade. Vista™ Window Film will help preserve the color brilliance of furnishings, fabrics, and carpets as well as help to protect fine woods, antiques and works of art.

Vista Window Film blocks 99.9% of all ultraviolet rays, which is the highest degree of protection available. For that reason, Vista is recommended by the Skin Cancer Foundation.

Enjoy the view

Virtually invisible, Vista™ Window Film:

- Lowers home cooling costs by as much as 50%
- Blocks up to 99.9% of the sun's ultraviolet rays to help reduce fading
- Cuts sun glare and reduces eye strain
- Helps insulate windows in cold weather (proprietary Low-E films)
- Evenly distributes heat by eliminating hot and cold spots
- All without obstructing your view!

Vista Window Film allows light to pass through your windows while screening out heat and dangerous ultraviolet rays.
